

**WHEN YOUR
MISSION
COUNTS,
TRUST US
TO DELIVER**

BORN IN BHARAT

At SSS Defence, our sniper rifles, assault weapon systems and tactical gear are proudly designed and manufactured in Bharat.

Our product development team represents a new generation of industrial designers, engineers, material scientists and machinists, all driven by a customer-centric mindset. For us, every design starts with a critical question:

"What features of this design truly benefit our elite military and law enforcement users?"

We also recognize that even the most innovative designs can fail if the materials don't meet the highest standards. That's why we never compromise on material quality. Only the finest materials are allowed on our shop floor - Ultra-high strength stainless steel, Aerospace-grade alloys, Carbon-reinforced polymers, Nickel-based superalloys, Advanced high-performance coatings. This unwavering commitment to design excellence and material integrity ensures that every SSS Defence product is built to withstand the most demanding operational environments.

SSS DEFENCE DNA

SSS Defence is a platform encompassing multiple verticals - Infantry & crew served weapons, Military ammunition, Precision optics integration & high performance tactical gear.

Over the past 7 years, we have established ourselves as the only 100% India owned private sector OEM with proprietary designs, ownership of intellectual property and infrastructure to manufacture, test and certify our futuristic firearm products on exacting global protocols.

However, we have a long history of manufacturing to mentor and guide us along the way. SSS Defence is part of the 70 year old Stumpp Schuele & Somappa Group of companies, India's largest spring manufacturing enterprise. It's in our DNA to make sure that every product engraved with the SSS Defence brand is the absolute best it can be before landing up in the hands of our soldiers. Every one of us takes enormous pride in our drive toward an "Atmanirbhar Bharat".

FROM THE CHAIRMAN & MANAGING DIRECTORS DESK

SSS Defence was born with the mission of being a 21st century defence R&D and manufacturing enterprise, striving to give our military and law enforcement the next generation of tools and equipment. Our mission is focused on developing products that are purpose designed and duty built to meet or exceed demanding challenges they face in this dangerous world.

Over the past 7 years, we have indigenously designed and manufactured a range of small arms systems that match global benchmarks. When asked if our products are truly “Made in India,” we proudly respond - our systems are “Born in Bharat.”

As we continue to prove that Bharat can leapfrog the world in firearms technology despite the private sector starting several years behind, we also do accept that the journey is long & arduous. That listening to our customers & constant innovation is key to building a reputation as a premier international OEM in our chosen space.

We thank you for being a part of our growth story & supporting our mission.

.338_{SABER} **SNIPER RIFLE**

Model	Caliber	Operation	Mag Capacity	Barrell Length	Length	Weight	Buttstock	Muzzle Device	Accuracy	Trigger Pull
SABER	.338 Lapua Magnum	Bolt Action	5 Rounds	27”in(685.8mm)	1200mm	7.5 kg	Adjustable with Cheek Rest	Muzzle Brake (Suppressor available)	1 MoA	2 – 3.5 lbs

FEATURES

The SABER is a next-generation sniper rifle, designed by integrating the latest advancements in sniper systems with insights from the world’s most demanding military professionals. Crafted for exceptional performance, it offers the perfect balance of strength, lightweight design, and unparalleled precision. Chambered in .338 Lapua Magnum, the SABER delivers outstanding sub-MOA accuracy at ranges exceeding 1,500 meters, making it a formidable tool for long-range engagements. Its modular, lightweight alloy chassis ensures robust durability while remaining adaptable to diverse mission requirements. Built to withstand extreme environments, the milled chassis guarantees reliable operation in all weather conditions. With fewer moving parts and a simple yet rugged construction, the SABER promises consistent, match-grade precision shot after shot. Whether deployed in harsh terrains or demanding tactical situations, the SSS Defence SABER provides military professionals with the confidence and capability to excel at the highest levels. Its innovative design and proven reliability make it a top choice for those seeking the ultimate in sniper rifle performance.

.308_{VIPER} **SNIPER RIFLE**

Model	Caliber	Operation	Mag Capacity	Barrell Length	Length	Weight	Buttstock	Muzzle Device	Accuracy	Trigger Pull
VIPER	7.62 x 51mm	Bolt Action	5 and 10 Rounds	24”in(609.6mm)	1200mm	6.4 kg	Adjustable with Cheek Rest	Muzzle Brake Suppressor available	1 MoA	2 – 3.5 lbs

FEATURES

Engineered for unparalleled long-range precision, the Viper Sniper Rifle delivers consistent, lethal accuracy at extreme distances. Chambered in 7.62x51mm NATO, the Viper excels in the harshest conditions, making it the ultimate tool for military and law enforcement professionals. Designed with a bolt-action mechanism and compatible with 5- or 10-round magazines, the Viper ensures reliability and precision with every shot. Its 24-inch (609.6mm) free-floating barrel enhances accuracy, while the muzzle brake reduces recoil for superior control. An optional suppressor further expands its operational versatility. Featuring a rugged, modular design, the Viper incorporates a MIL-STD 1913 Picatinny rail system, enabling easy customization with optics and tactical accessories. With an adjustable 2–3.5 lb trigger, shooters can achieve optimal responsiveness and precision. Built for reliability in extreme environments, the Viper requires minimal maintenance while delivering maximum performance. When precision, power, and versatility are non-negotiable, the Viper is ready to dominate.

P72

7.62 x 39mm

ASSAULT RIFLE

Model	Caliber	Operation	Mag Capacity	Barrell Length	Length	Weight	Buttstock	Muzzle Device	Firing Mode
P72	7.62 x 39mm	Gas Operated / Long-Stroke Piston	30 Rounds	16.3" in (414.02mm)	883.5mm	3.8kg	Adjustable/Foldable	Flash Suppressor	Safe/Semi/Auto

FEATURES

SSS Defence weapons have been engineered with the needs of the operator in mind. They are highly effective individual automatic weapons designed for special forces, army element and law enforcement personnel and guarantee high quality, strength and endurance. The P72 is a fully automatic assault Rifle chambered for the 7.62x39mm cartridge. The P72 joins the crop of other AK variants & clones in its use of a long stroke piston system but has a more balanced weight distribution relative to other AK variants. It is among the only 7.62x39 assault weapons that comes with a left side non-reciprocating charging handle - a unique attribute for squads operating in confined spaces. Featuring a milled receiver, the weapon has Integral Rails at 12 & 6, M-LOK Rails at 3 & 9 positions and provides ample space for mounting accessories such as sights, lasers. The standard 16" barrel is offered with a chrome plated or Nitride finish and gives an effective range of 400-500 meters. The gas-operated long-stroke piston mechanism delivers dependable performance, reducing recoil for precise follow-up shots. This combination of power and control makes it lethal in diverse combat scenarios.

M72^{5.56 X 45mm}

ASSAULT RIFLE

Model	Caliber	Operation	Mag Capacity	Barrell Length	Length	Weight	Buttstock	Muzzle Device	Firing Mode
M72	5.56 x 45mm	Gas Operated / Short-Stroke Piston	30 Rounds	10.5" in (266.7mm) 12.5" in (317.5mm) 14.5" in (368.3mm)	715mm 765mm 815mm	2.8kg 2.9kg 3.0kg	Adjustable	Muzzle Brake	Safe/Semi/Auto

FEATURES

SSS Defence weapons have been engineered with the needs of the operator in mind. They are highly effective individual automatic weapons designed for special forces, army element and law enforcement personnel and guarantee high quality, strength and endurance. The SSS Defence M72 rivals the firepower of some of the most modern weapons in combat & tactical operations. Chambered for the 5.56x45mm caliber ammunition, the M72 is designed for reliability, accuracy, and adaptability in the harshest conditions. The short stroke piston system of the M72 ensures cleaner operation, reduced recoil, and superior control - allowing operators to stay in the fight longer and with greater accuracy. The M72 can be configured for different barrel lengths - 10.5", 12.5", 14.5" and 16" based on mission criteria and barrel can be offered with a chrome plating or nitride finish to the bore. The barrel production process provides high wear resistance at the time of firing, as well as excellent accuracy and concentration of fire. The rifle's ambidextrous controls include a multi-mode fire selector (Safe, Semi, Auto), charging handle and magazine catch for greater versatility. Keeping in mind the operator's form factor, the design incorporates multiple ergonomic features. The M72 has also been equipped with a drop-in trigger, an adjustable buttstock and Picatinny rails at 3, 6, 9 and 12 o'clock positions to add on accessories as the mission demands. The external Cerakote finish ensures that the weapon can withstand extreme environments and has higher corrosion resistance.

T72_{7.62 x 51mm}

VIPER DMR

Model	Caliber	Operation	Mag Capacity	Barrell Length	Weight	Buttstock	Muzzle Device	Accuracy	Trigger Pull
T72	7.62 x 51mm	Short stroke Gas piston	20 Rounds	16" in (406.1mm) 20" in (508mm) 24" in (609.6mm)	4.4 kg 4.8 kg 5.5 kg	Adjustable buttstock + adjustable cheek rest	Muzzle break / (suppressor available)	1 MoA	3lbs

FEATURES

The VIPER DMR is a 7.62x51mm NATO rifle designed for precision, reliability, and adaptability in demanding environments. Utilizing a short-stroke gas piston system, it ensures smooth operation and reduced fouling, delivering consistent performance in harsh conditions. The rifle is available with 16.5", 20", or 24" free-floating barrels, giving shooters the flexibility to balance manoeuvrability with long-range accuracy. Its adjustable buttstock, featuring an adjustable cheek rest, enhances shooter comfort and stability, while the muzzle brake compatible with a suppressor helps manage recoil for superior control. Built with lightweight yet durable aluminium receivers, the VIPER DMR maintains strength without unnecessary bulk. Its 20-round magazine capacity ensures sustained firepower, while the 3 lb trigger pull enables crisp, precise shots. The MIL-STD 1913 handguard allows seamless accessory customization, and the ambidextrous charging handle enhances operational efficiency. Engineered for long-range engagements, overwatch roles, and tactical missions, the VIPER DMR delivers unparalleled accuracy, power and versatility-making it a top-tier choice for marksmen and tactical professionals.

G72_{9 X 19mm}

SUB MACHINE GUN

Model	Caliber	Operation	Mag Capacity	Barrell Length	Weight	Length	Buttstock	Muzzle Device	Firing Mode
G72	9 x19mm	Delayed Roller Blow Back System	30 Rounds	8.7" in (220.98mm)	3kg	646.2mm	Foldable	Flash Suppressor	Safe/Semi/Auto

FEATURES

SSS Defence weapons have been engineered with the needs of the operator in mind. They are highly effective individual automatic weapons designed for special forces, army element and law enforcement personnel and guarantee high quality, strength and endurance. The G72 from SSS DEFENCE is a versatile, modular submachine gun chambered for the 9x19mm NATO cartridge. It is a reliable, customizable weapon ideal for tactical use, VIP security, and close-quarters battle (CQB) scenarios. Allowing for operation in semi-automatic and full-automatic modes, the G72's roller-delayed blowback system ensures accuracy and control in full-auto fire. The G72 can be configured for different barrel lengths - 8.7" and a compact version, based on mission criteria. The barrel can also be offered with a chrome plating or nitride finish to the bore. The ambidextrous selector doubles as a safety lever and the side-folding stock locks securely in both positions. The free-floating handguard design aids heat dissipation, protecting the user's hands. With Integral Rails at 12 & 6, M-LOK Rails at 3 & 9 positions, the G72 supports various accessories like sights, lasers and grips. Constructed from aerospace-grade aluminium and high strength steel alloys, it's both lightweight and durable. Integral backup sights and a muzzle brake come standard, with the threaded muzzle allowing for easy suppressor attachment.

Caliber: 9mm for optimal stopping power with low recoil

Durability: Built to withstand harsh conditions & demanding missions

Operating System: Blow Back System

Accuracy: Ensures precision in rapid-fire situations

Customization: Modular design, Personalized configurations, MIL-STD 1913 Picatinny rail supports tactical lights and lasers

Reliability: Designed for military and law enforcement professionals

Model	Caliber	Operation	Mag Capacity	Barrell Length	Weight	Length	Muzzle Device	Safety
G72-P	9 x19mm	Blow Back	15 - 17 Rounds	102.0mm	0.617kg	176.0mm	Compatible Suppressor	Applied & Mechanical

FEATURES

The SSS Defence G72-P 9x19mm Pistol is a high-performance, reliable sidearm designed for military and law enforcement use. With its excellent stopping power and low recoil, it ensures accuracy in rapid-fire situations. Engineered with a blowback action and a 15–17 round magazine capacity, the G72-P offers superior control and smooth operation. Featuring an ergonomic grip and modular design, the pistol allows for customization to meet operational needs. A MIL-STD 1913 Picatinny rail supports attachments such as tactical lights and lasers, enhancing its adaptability. Additionally, the 176.0mm overall length and compatible suppressor option further expand its versatility in various combat scenarios. Built to endure harsh conditions, the G72-P delivers consistent performance and reliability, making it the ideal choice for professionals requiring a durable and adaptable sidearm. Its applied and mechanical safety features ensure secure handling, reinforcing confidence in high-pressure situations.

M72 5.56 x 45mm
LIGHT MACHINE GUN

Model	Caliber	Operation	Trigger	Muzzle Velocity	Weight	Feed System	Barrel Profile	Rifling Twist:
M72 LMG	5.56 x 45mm	Auto/Semi	Mil-Spec	~910 m/s (2,970 ft/s)	3.3 kg (weapon alone) 7.5 kg (with drum magazine, ammo, and bipod)	Magazine-fed, up to 100 rounds	14.5" chrome-lined 16" chrome-lined	1 turn in 7", right-hand twist

FEATURES

The SSS Defence LMG was originally designed and tooled to comply with benchmarks found in solicitations for some of the most competitive and high-performance weapons. The objective was to build a weapon that meets the rigorous standards and requirements of the world’s top-tier asymmetric warfare units. The weapon is designed to serve an optimal mix of manoeuvrability and end-user convenience while delivering maximum energy on target. The M72 5.56X45 uses a short stroke piston-based operating system and features a chrome lined barrel manufactured to military specifications. It can be used in both an assault rifle as well as a machine gun role. The machine gun variant can be customized with a 14.5” or 16” barrel based on user requirements. The weapon and comes with a dual drum magazine capable of feeding up to 100 rounds. The M72 handguards are lightweight but rigid and resistant to deflection from static load and impact shock. We have only applied superior strength steel alloys for key pressure parts and use a mix of light aluminium alloys and high strength impact modified polymer for the balance. All metal parts of the weapon are specially treated to be corrosion resistant. The weapon allows the use of all variety of optical sights with 1913 Picatinny rails being provided for mounting.

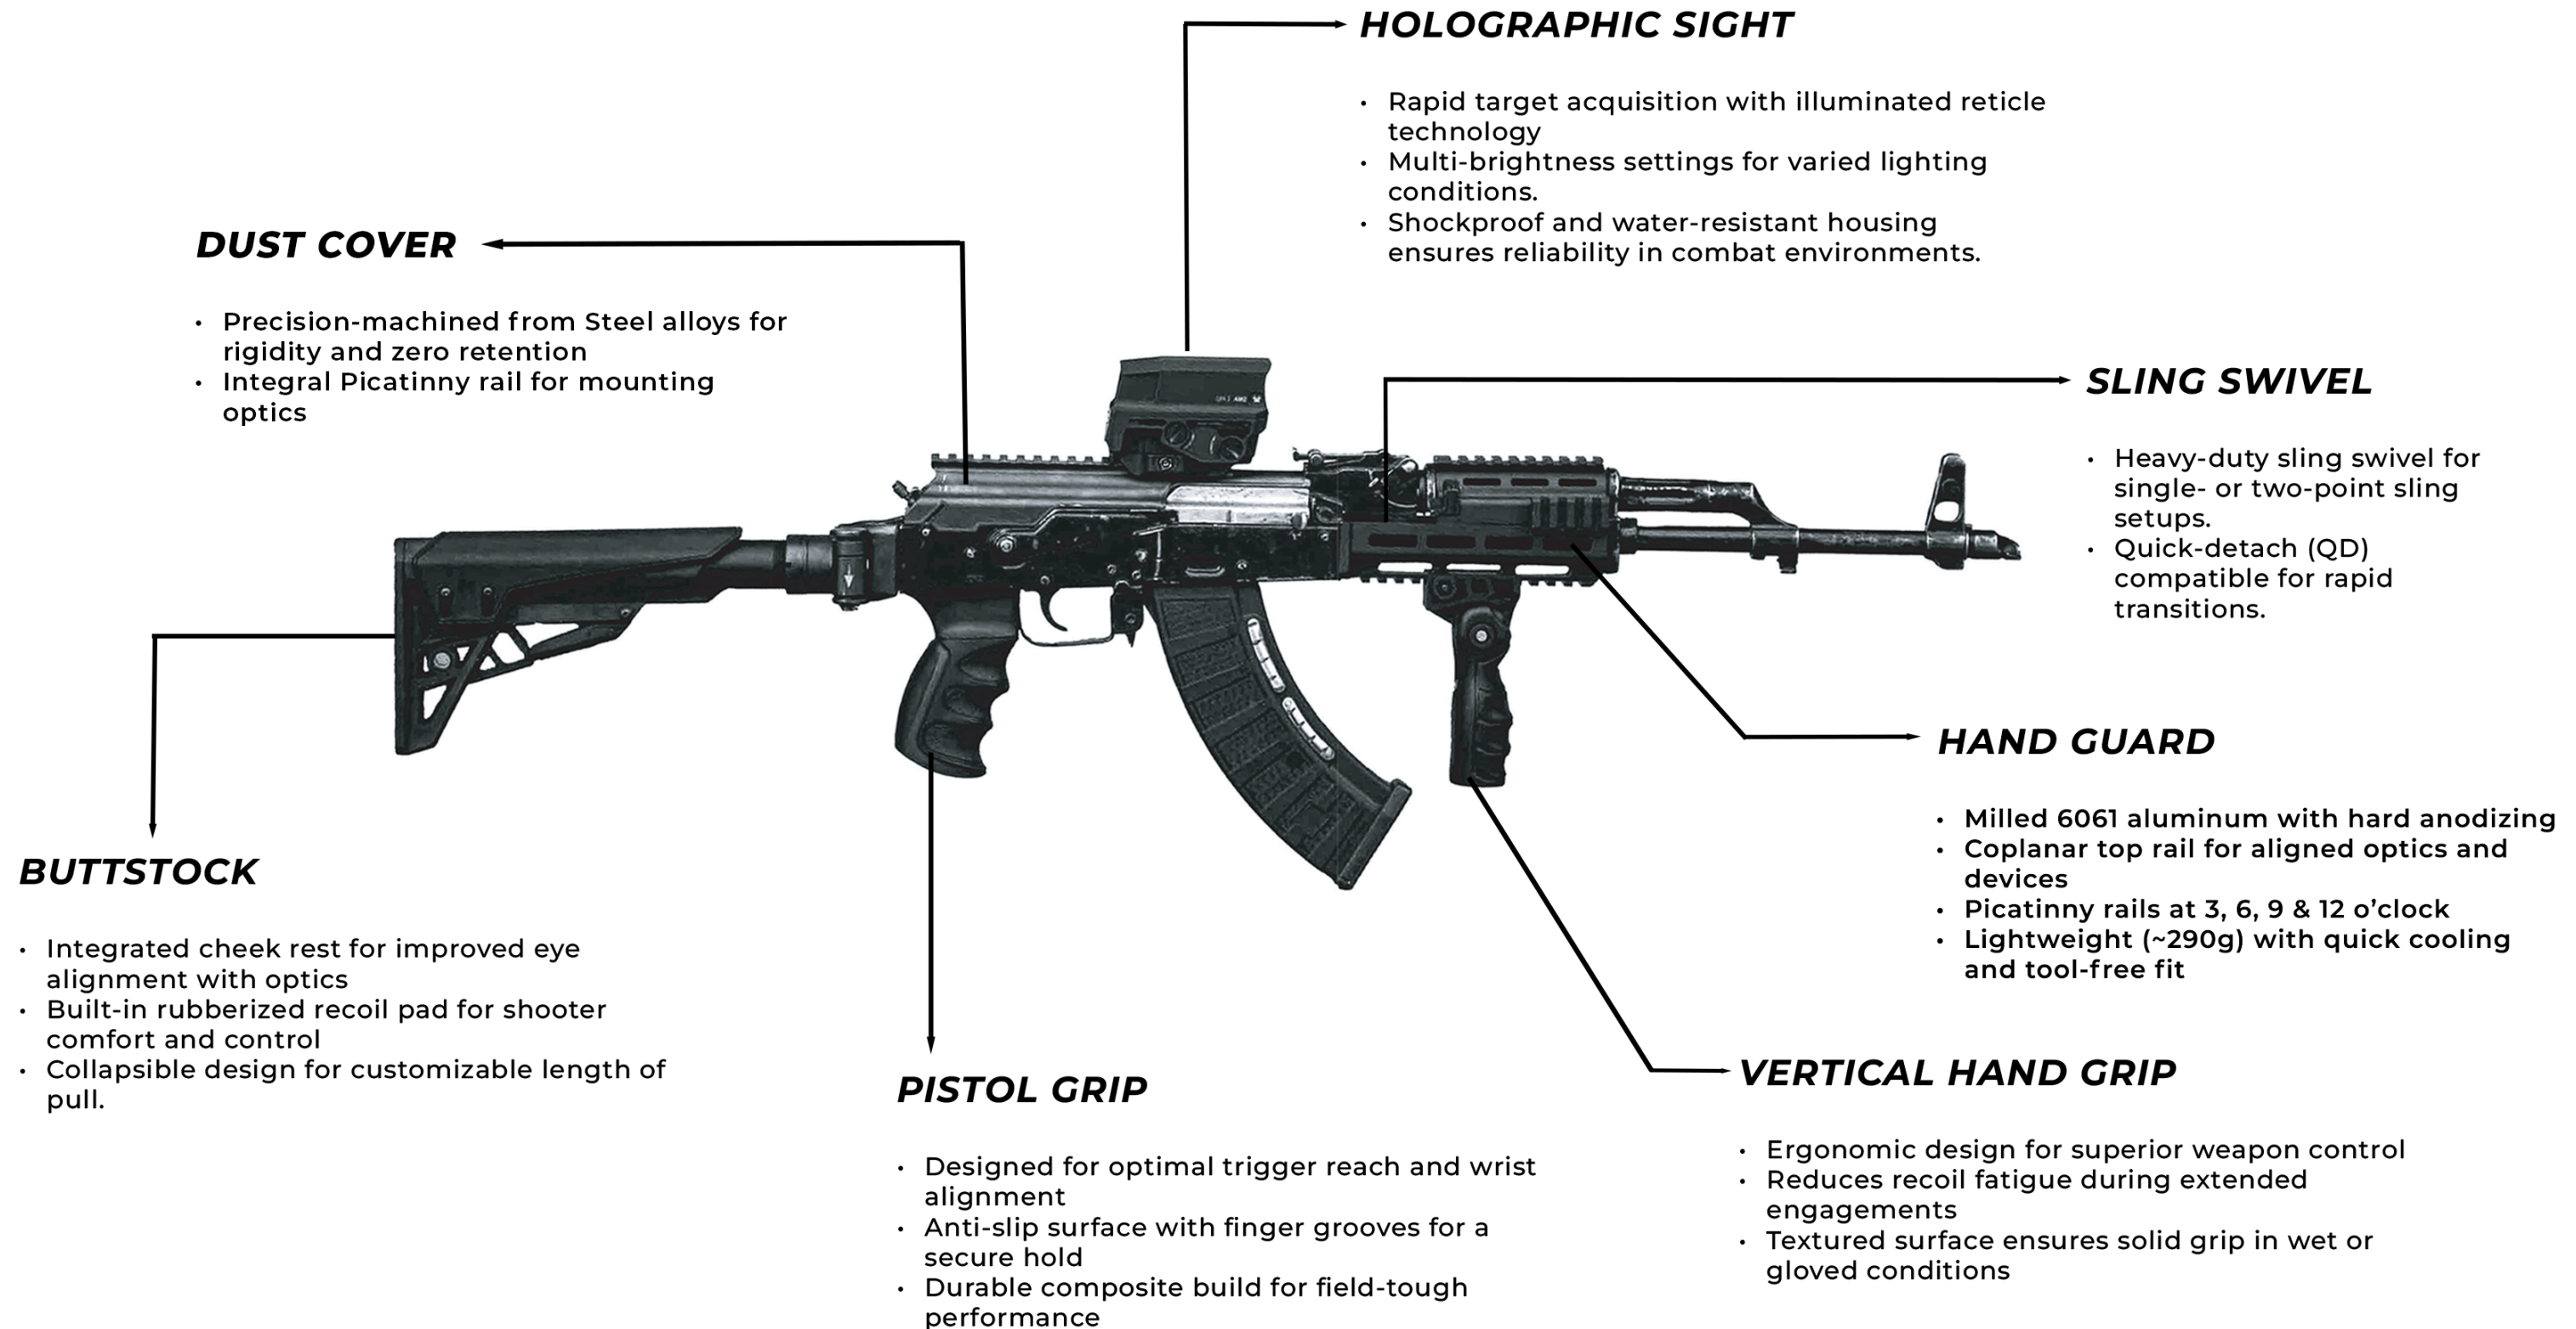

RAPTOR 7.62 x 35mm

.300 BLACKOUT

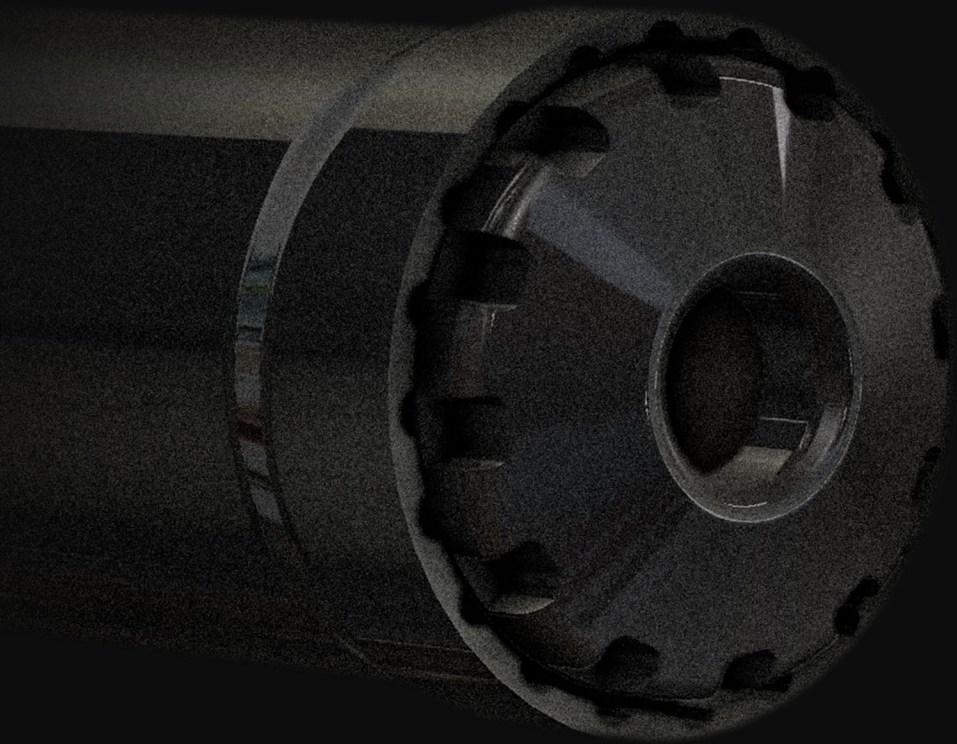

Model	Caliber	Operation	Barrel Length	Muzzle Velocity	Weight	Rifling Twist:
RAPTOR	7.62 x 35mm	Rotating bolt	8.5" in (216 mm) 10.5" in (267 mm)	~625 m/s (2,050 ft/s)	3.2 kg (with suppressor) 3.5 kg (with suppressor)	1 turn in 7", right-hand twist

FEATURES

The Raptor is a revolutionary tactical rifle engineered for modern law enforcement professionals who demand unmatched performance, reliability, and versatility. Chambered in the proven .300 Blackout cartridge, it delivers devastating stopping power with dual-mission capability—subsonic rounds for quiet, suppressed operations and supersonic loads for precise long-range engagements. Built with precision-machined barrels, an optimized gas system, and advanced materials, the Raptor offers consistent shot-to-shot accuracy and rugged durability across urban, wilderness, and extreme weather environments. Its compact, ergonomic design enhances maneuverability without sacrificing control, while a minimal recoil system enables rapid follow-up shots under pressure. Integrated Picatinny rails allow easy customization with mission-specific accessories, making it ideal for close-quarters tactical operations, covert missions, and precision engagements alike. With mission-critical reliability tested in the toughest conditions, professional-grade engineering, and a modular platform that adapts to diverse law enforcement needs, the Raptor sets the standard for tactical excellence. Experience the future of law enforcement firepower and dominate the field with a rifle built to endure and perform.

SUPPRESSORS

As a full-spectrum OEM of firearms and firearm components, we design and manufacture high-performance baffle-type suppressors that are precision-matched to our weapon systems. Developed for professional use in military and law enforcement environments, our suppressors are available for a wide range of calibers including 9x19mm, 5.56x45mm, 7.62x39mm, 7.62x51mm, and 0.338 Lapua Magnum.

Engineered for durability and optimal sound and flash suppression, each unit is manufactured using high-grade materials and advanced production techniques. Our suppressors ensure reliable performance, minimal point-of-impact shift, and enhanced operational stealth—delivering superior tactical advantage when paired with our firearms in both close-quarters and long-range engagements.
